I see what you mean if you just right click and select print. If you highlight all the fields you're wanting to print and then right click-print, it includes the whole assessment.

As for the illegal drugs, if the client is currently clean when she enters the program, then the answer should be no. The answer should only be yes if the client is still actively using drugs and has not yet gotten clean.

Subject: ATA Questions

Emily,

We are having problems printing the full assessments directly off the website. It will only allow us to print the first two pages and nothing else. Can you assist us in the correct process to print documents for our charts.

Also, the assessment asks, "Do you use illegal drugs" we have responded no to all residents, because when they enter into our program, they must have a clean drug screening and to have been clean for a minimum of 30 days. However, over 50% of our residents have substance abuse history. We would like to have a clearer understanding of this question as many of our ATA clients are in current drug treatment programs.

Thank you,
Nikohl
